

DESIGNING FOR A BETTER TOMORROW

Being a part of the vibrant, innovative, and diverse Houston community since 1983, STOA Architects is continually inspired by the growth of Houston and the opportunity to create an environment that engages the unique character and vision of each project we undertake.

Designing A Unique Sense of Place for Communities

STOA International Architects, Inc. is an award-winning architecture firm delivering innovative design solutions that not only serve the operational goals of our clients, but that also express the importance of our client's role in the greater community at large.

Our future-oriented designs focus on the shape of the environment and the people inhabiting the space to build a sense of community for a better tomorrow.

Our Work

Portfolio highlights include the Mickey Leland International Terminal at George Bush Intercontinental Airport, the University of Houston Welcome Center, and the George R. Brown Convention Center.

400+ Public Works, Healthcare & Commercial Projects

60+ Regional, National & International Design Awards

15+ Silver & Gold LEED Certified Projects

Rice University James Baker Hall

Unique Qualifications

Our firm has long practiced a unique design approach that incorporates traditional Feng Shui practices with modern green design methods, which we call "Green TEA" (Total Environmental Alignment).

STOA's approach aligns the energy and spiritual experience of Feng Shui with the modern ideas of energy-efficiency. STOA considers factors such as the size, shape, and layout of the building as well as the landscape and surrounding buildings to create an ideal environment. We then recommend the best lighting options, color schemes, furniture placement, and materials to enrich people's experience within the space.

Our Services

- Architecture
- Construction Management
- Project Management
- Master Planning
- LEED Design / Certification
- Forensic Investigation
- Programming
